Instructor: Dr. Eric Hill
Office: UTL G81
Email: ehill8@jhu.edu
Time: Tuesday and Thursday 5-6 pm: Krieger 308.
Office hours: By appointment.
Credits: 0
Grading: Satisfactory/Unsatisfactory based exclusively on attendance.
Teaching Assistants: Mitchell Porter

Section: You should only be enrolled in this course if you are in Dr. Tolmans’s section of Into chem. If you are in Dr. Sunita’s section you should switch into 030.112.01, which meets from 6:30-7:30 pm in Schaffer 304.

Objectives:
The goal of this course is to strengthen the problem solving skills for students co-registered in 030.101 who have had minimal previous exposure to chemistry.

Attendance Policy:
This course is designed as a supplemental addition to 030.101, it is expected that students make a commitment to attend. You will be allotted a maximum of 5 absences during the semester, exceeding the maximum permitted absences will result in an unsatisfactory; I can’t help you if you don’t show up.

Excused absences require a either a doctor’s note or previous permission from the instructor (not the TA). Varsity athletes are required to provide a copy of their schedule in advance, if it will result in conflicts. Fraternity activities, dance recitals or any other optional event will not count as an excused absence. Though attendance will be recorded, it is solely the responsibility of each individual to keep track of their personal absence total.

If you are more interested in occasional assistance on specific topics, the learning den and TA help sessions are other possibilities.

Materials:
There are no additional materials required beyond those for 030.101. Please bring a scientific calculator with you for each meeting.

You are advised to register for a PILOT group in addition to this course.
